**LETTER OF RECOMMENDATION**

It gives me immense delight to write a letter of recommendation for my student, PATEL RIDDHI KIRTIBHAI, as she is apt to be a part of your university and study in a graduate programme. Riddhi was enthusiastic and curious to learn, explore and grasp everything about networking. An eager and keen student in getting anything new in his field, she has regularly kept himself updated about the latest developments. The perseverant hard worker Riddhi is she performed exceptionally well in the classes and the practical labs. She has been consistent in academics, retaining his position among a few of the most hardworking and diligent students with keen knowledge about all his classes and labs throughout his undergraduate degree. I have seen a glad urge in him to understand engineering concepts beyond the theoretical purview, reflecting his research potential. Riddhi is an independent thinker who seeks to learn more. Riddhi has shown great promise by venturing beyond the limits of the course curriculum. He keeps himself updated with the latest industry developments and reviews various technical literature, as evident from the technical discussions and interviews I have had with him. she is one of my students who believe in performing to the best of his ability. Riddhi will work very hard toward the fulfillment of the responsibility that is designated to him. His zest to constantly be on the path of learning and his time-management abilities will surely take him a long way. I strongly recommend him for his graduate studies admission at your university after she completes his bachelor of engineering.
